

Got great coding skilz?

RU dreaming in C(++)?

getJobFromSecious ();

Changing the game!

Are you searching for something special which suits your capabilities? You want to demonstrate your creativity and enjoy the freedom to create new paths?

If you believe you are sufficiently powerful and capable to change our future, prove it and check the "code" below!

```
if (you != NULL) {
    switch (youDo) {
        case "Standard, common, predictable jobs are not your preferred choice?":
        case "Programming is your passion and you already started in your early days?":
        case "You are fascinated by handcrafting unique solutions by yourself, to solve daily issues?":
        case "You are actively applying hacking techniques and cryptography?":
        case "You are a "real" programmer and not a script kiddie?":
        case "You do understand how a computer functions? Not by watching YouTube videos, but because you have been engaged with hardware, operating systems and low-level programming (preferable in C)?":
        case "Being involved in something totally new doesn't scare you, even this means that you have to learn a lot of things from scratch?":
        case "Data protection, privacy and control are bothering you, and you want to change something?":
            seclousTeam.add(new Employee (you) );

            Add (Knowledge) - Insight and training into our ground-breaking Non-Visible-Data technology);
            Add (Flexibility) - In regard to working times, remote-work etc. - you work results are key to us, not your time in the office;
            Add (Fascination) - You will be involved in quite different engagements, spanning from IoT/Cloud, data brokerage, to even unique solutions for the maritime industry;

        default:
            return;
    }
}
```

The SECIUS team is focusing on changing the way we handle our data today and especially in the future. Comparable to innovations like the blockchain, we are inventing and developing truly unique solutions which bridge between the freedom of data (ease of use, freedom of data location, autonomous and continuous data protection) and data control (true revocation of shared data, anonymous data transfer and storage, no meta information). We ensure that everyone re-gains control of his data!

So, if you actively want to ensure that our future will be brighter, more secure and less externally determined, just send us your application and CV to become part of our team in Munich!

Wir freuen uns auf Deine Bewerbung!
